

Construction - Enabling

The Praezis Advantage

Recognized for attention to detail and speed of service, ATH-Praezis balances innovative, responsive solutions with a pragmatic, cost-conscious approach. This client-centred philosophy earns ATH-Praezis customer trust and lasting business relationships.

ATH-Praezis works with its customers on any size of project - small or large, urgent or planned - meeting client's current and future needs.

Each assignment is led by one of ATH-Praezis hands-on principals and embraced by a carefully selected project team of seasoned professionals. Service 'Building Blocks' already available with ATH-Praezis may be configured, utilized, or completely new solutions structured.

These core teams, carefully selected and resourced, collaborate with customers' staff in order to completely satisfy customers' objectives. Services are provided from a choice of several 'verticals'.

ATH-Praezis is excited to work with customers who are recognized in their industry-sector for delivering projects with finesse and intelligence. Its expertise and services enables customers innovate and even take on daring challenges.

Great construction doesn't get delivered 'by chance'. Our customers have a steady commitment to excellence in construction delivered through seasoned professionals, maintaining sophisticated business systems. They turn words, lists, orders, and designs into reality.

ATH-Praezis takes pride in supporting its customers with various economically-priced, 'tailor-made' service interventions that enable sharper 'attention-to-detail'. This permits customer's focus its own valuable staff to execute and implement construction with dedication and pride. Enabling services from ATH-Praezis experts helps deliver construction to perfection.

ATH-Praezis, with the wealth of experience of its staff, teams up with customers' lead professionals, helping them cost-effectively execute objectives efficiently, deliver the best project value, and assure asset's future.

Services may be provided in any of the key areas, i.e. construction approach with proven procedures; utilization of available resources; capturing 'lessons' learnt'; 'building feedback' into next project; value engineering; change order analysis; real-time cost evaluations & cost feedback; interpretation of design documentation (conceptual, schematic, development, construction, etc.); handling design-queries; project requirements reviews, review of building & systems performance criteria, asset operability reviews, constructability reviews, project site reviews, engineering document digitization, construction documentation (field inspection reports, pre-commissioning, commissioning, hand-over, as-builts, etc.).

ATH-Praezis' cost-effective services can be instrumental for customers to tackle often-competing objectives of performance, quality, cost and schedule; better defining & tackling existing conditions through improved definition of scope, identification of infrastructure limitations, highlighting construction & maintenance concerns; more efficient use of materials; mitigating potential rework and waste on jobsite; increase in productivity; invoking good site & cost controls; improving building utilization; organizing timely billing and invoicing; deployment of legitimate active women & minority-owned businesses; putting in place productivity-tracking strategies; maximization of efficiency; utilization of best practices; conformation to design codes. This can be done for all stages of project - pre-development, pre-construction, construction, post-construction - whether the project is a re-design green-field or a brown-field one.
