

# Portfolio

ATH-Præzis specializes in services which enable its customers so that they may economically, efficiently implement strategies and effect plans. Customers whether in the role as Owners, Consultants, Contractors or Service Providers, require quick, responsive and price-economical resources so that the customers may act timely with realistic and workable solutions.

## Built Environment

Conceptualization, designing, construction and bringing into operation of a project is a complex effort which requires great attention to detail, balancing aesthetics with engineering constraints. It is also challenging as newer materials and techniques are introduced to satisfy constantly shifting end-user preferences.

Whether it is a 'green-field', a refurbishment, a conversion, or a simple retrofit-modernization-up grade, in a competitive-market costs of providing services remain under pressure.

ATH-Præzis is able to work with its clients-synergistically, with real-time responsiveness at any given stage of the project.

## Energy

ATH-Præzis works closely with its customers enabling them to use the planet's energy resources conservatively and responsibly, helping them win at a reasonable price.

An approach of continuous reduction in carbon-footprint, maintaining enhanced service-experience - provides not just 'savings to the pocket', but also gives peace of mind to end-consumer.

Energy wisdom is applied at every stage of an initiative; right form conceptualization through design, construction, and operations. ATH-Præzis helps clients in 'designing-in' energy-conservation into a project.

## Hospitality

Hospitality industry is arguably, the most competitive sectors to be in. Service standards are dictated by the consumer; costs are continuously challenged.

Consumer demands are taking new forms in a pandemic 'environment'; putting further pressures on revenue. Operators are forced to seek further ways of efficiency-enhancement, cost-reponsibly. Industry operators now also need to reduce their exposure to customer complaints and claims, and insurance costs.

ATH-Præzis with its expertise in Hospitality and business processes, enables its customers, by working silently, back-office, in various department and roles.

## Process & Petrochemicals

ATH-Præzis supports customers in all aspects of manufacturing and processing facilities. It covers oil & gas, petrochemicals, downstream, chemicals, manufacturing - starting right from concept stage through to commissioning and handover.

Following sound project management, change control principles, ATH-Præzis helps in effective project delivery. All design limits and constraints are handled with great attention and detail to deliver optimised solutions.

Customer successfully delivers - synergistically employing ATH-Præzis expertise - entirely "green-field", "brown-field" or "modifications". competitive market,

Partner for **Perfect Advantage**
